📁 Work History

[Software Engineer](#), STACK CT: Blue Ash, Ohio

2018 - Present

- item 1
- item 2
- item 3
- item 4
- item 5

[Mobile Engineer](#), Atomic Robot: Cincinnati, Ohio

2016 - 2018

- **Client: Kroger Technology** - Android, Kotlin, Java
 - Rebuilt the registration flow for the Kroger App, allowing users to create new accounts, select a preferred store, and add a loyalty card.
 - Worked in conjunction with 84.51° to replace the App Feedback survey page with a new survey page powered by Qualtrics with no lapse in availability for users.
- **Client: PLXIS** - JUnit, DevOps, Groovy
 - Built a simulator in Groovy using TDD to develop a connection for a new payment provider on the PLXIS payment gateway. The gateway processed an average of 20M transactions per day under VISA, Mastercard, AMEX.
 - Investigated anomalies in real time on the PLXIS platform using Splunk.

[Mobile Developer \(Summer Intern\)](#), Pygraphics: Argyle, Texas

Summers 2014 - 2015

- Developed initial version of a 3D Marching Band Drill app for Android and iOS using Unity3D and Xcode respectively.
